

FUEL WATCH

Fuel Watch syncs with your fuel providers, pulling in your fuel data and breaking this data down into quick, easy to understand reports.

FUEL
WATCH

Compare your fuel spend in a glance

Features

- **Graphical display** A running graph displays your fuel spend so that you can quickly see and spot trends.
- Automatically imports your fuel card data.
- Clear and concise reporting available on the web, PDF and CSV format.
- **Transaction Report** Summarizes and simplifies your fuel spend.
- **Fuel Summary Report** - Shows all transactions the vehicle has had, the average kms per fill and the total spend for that vehicle for the reporting period.
- **Fuel Location Report** - Shows if a card has been used when the vehicle it is assigned to was not at the same location that the card was used at.
- **Non Fuel Report** - Shows when products other than fuel are purchased.
- **Fuel Matching Report** - Shows if a car is filled with the incorrect fuel type. eg) A petrol filled with diesel.
- **Overfill Report** - Outlines the largest fill each vehicle has per month. This makes it very easy to see if people are also filling jerry cans up when filling the

Benefits

- Save on fuel costs.
- Identify and stop fuel fraud.
- Understandable reports. Analyses the piles of paper of your fuel bill so you don't have to.
- Manage your fuel transactions in one place.
- Track performances and trends of fuel spend and fuel efficiency. Quickly see if your fuel spend is going up or down.
